

# ATWWI Wiz Alert Cell Phone Text Message System Instructions

Greetings ATWWI Family,

A number of you have requested to be added to the *ATWWI "Wiz Alert"* cell phone text messaging system. This **EXCITING NEW ATWWI** additional benefit will launch on Monday, January 25, 2010! Please allow us to explain what information is required in order to receive this benefit.

Most cell phone carriers will automatically assign an actual email address to your cell phone, free of charge. Additionally, in order for you to utilize this service, provided by your cell phone service provider, **typically** you must subscribe to a data plan or text messaging plan with your provider.

In order for the *ATWWI* technical support team to be able to add you to our cell phone email/texting list please submit your **cell phone** email address to [cs@askthewiz.info](mailto:cs@askthewiz.info). It usually appears similar to the following:

## **Example A**

[\(areacode\)+cellnumber@yourcarrier.net](mailto:(areacode)+cellnumber@yourcarrier.net)

## **Example B**

[\(123\)4567890@txt.att.net](mailto:(123)4567890@txt.att.net) (please note this provider has *txt.att.net* as the extension).

**NOTE: If you are unsure of your cell phone email address please contact your service provider and inquire or simply,**

1. Go to the **text messaging** function on your cell phone.
2. Click "**new**" to start a new message.
3. On the "**To:**" line type in your current **personal** email address.
4. In the subject area type "**test**".
5. Click send.
6. Go to your computer, log into your personal email provider, ie. yahoo, hotmail, bellsouth.net, etc. The message from your cell phone should be in your inbox.
7. Open the email. In the "From:" section your **cell phone** email address should appear.
8. Please forward that email to [cs@askthewiz.info](mailto:cs@askthewiz.info).

Peace and Blessings,

*Tech Support*
